```
renal principal cell (CL:0005009) - 1852
                 kidney distal convoluted tubule epithelial cell (CL:1000849) -15492
    kidney loop of Henle thick ascending limb epithelial cell (CL:1001106) -63644
                                   epithelial cell of proximal tubule (CL:0002306) - 0196
                                  columnar/cuboidal epithelial cell (CL:0000075) - 129
                              glomerular capillary endothelial cell (CL:1001005) - 235
                                                        endothelial cell (CL:0000115) -30213
      kidney loop of Henle thin ascending limb epithelial cell (CL:1001107) -8197
                              kidney collecting duct principal cell (CL:1001431) -29679
                          kidney collecting duct intercalated cell (CL:1001432) -16717
                                                           epithelial cell (CL:0000066) -20033
                                                  kidney epithelial cell (CL:0002518) -8467
                                          glomerular endothelial cell (CL:0002188) - 622
                                                renal intercalated cell (CL:0005010) - 4880
                                    kidney capillary endothelial cell (CL:1000892) -1008
                                                               enterocyte (CL:0000584) - 17
                                                                                                         60
                                                               native cell (CL:0000003) -
                                               stratified epithelial cell (CL:0000079) -
                                                                                                         2
                                                             myeloid cell (CL:0000763) -
                                                                                                         23
                              professional antigen presenting cell (CL:0000145) -
                                                                                                         5
                                                               goblet cell (CL:0000160) -
                                                          endocrine cell (CL:0000163) -
                                                               acinar cell (CL:0000622) -
                                                                                                         1
                                                            chondrocyte (CL:0000138) -
                                                                                                             2138
                                                                     T cell (CL:0000084) -
                                                                                                              385
                                                         cytotoxic T cell (CL:0000910) -
                                                       mature NK T cell (CL:0000814) -
                                                                                                              1165
                                     CD4-positive, alpha-beta T cell (CL:0000624) -
                                                                                                              2435
                                     CD8-positive, alpha-beta T cell (CL:0000625) -
                                                                                                              1232
                                                                monocyte (CL:0000576) -
                                                                                                                    1191
